EDUCATION

B.SC in Software Engineering

Daffodil International University
2023 – Present

Higher Education Certificate

Shaheed Ramizuddin Cantonment
College
2020 – 2022

Secondary School Certificate

BRRI High School
2018 – 2020

SKILLS

- MS Word & MS Excel
- C, Java, Dart, HTML, CSS, JS, PHP
- Wordpress Development (Elementor)
- UI/UX DESIGN (FIGMA)
- SQL & Database Management
- Project Management
- Node.js, React, Python

LANGUAGES

- BENGALI – NATIVE
- ENGLISH – PROFICIENT

INTERESTS

- UI/UX design
- Web & App Design

ABOUT ME

I am motivated and detail-oriented Software Engineering student at Daffodil International University with practical experience in C, Java, WordPress development, UI/UX design, and project management. Strong problem-solving skills with hands-on involvement in software projects and a passion for continuous learning.

WORK EXPERIENCE

WordPress Internship

June 2025 – September 2025

TechDSF

During my internship, I gained hands-on experience in WordPress development using the Elementor free version. I created custom headers, footers, and responsive web pages, ensuring a smooth user experience across devices. Additionally, I worked on converting Figma designs into functional WordPress websites, resolving layout consistency issues and maintaining design accuracy throughout the process.

WordPress Trainee

February 2025 – June 2025

TechDSF

I have trained in WordPress development using the Elementor free version, where I created custom headers, footers, and responsive web pages. I also worked on converting Figma designs into fully functional WordPress websites while ensuring layout consistency and resolving design-related issues effectively.

BLC Trainee Associate

November 2024 – January 2025

Blended Learning Center, DIU

I supported the management of the university's Blended Learning System (LMS), assisting faculty and students with resource organization and various system tasks. Through this role, I enhanced my communication, teamwork, and organizational skills while contributing to the effective use of the LMS for academic activities.

CERTIFICATIONS

- MS Word & MS Excel – BGIFT
- C Language – 10 Minutes School
- WordPress (Elementor) – TechDSF
- Completed Machine Learning Algorithms certification from Simplilearn.

PROJECTS

Banking Transaction Management System

I developed a console-based banking system in C that supported account creation, deposits, withdrawals, and transaction tracking. The project emphasized user-friendly design and secure transaction handling.

LibraLink: Intelligent Library Resource System

I contributed to the development of a library management system aimed at improving resource tracking and user experience. My responsibilities included working with Java, database management, and UI design.

WeatherPro

I created an Android weather application using Java that provided real-time weather updates. This project integrated a weather API for accurate forecasting and included a responsive user interface for better usability.

Portfolio Website (Ongoing)

I am currently designing and developing a personal portfolio using WordPress and Elementor. The focus of this project is on responsive design and ensuring compatibility across multiple devices.

Web Design for TechDSF (Trainee Project)

As part of my WordPress training at TechDSF, I developed web page designs with a focus on layout structure, responsive elements, and design consistency.

Nextarior LMS Website (Client Project)

I built a responsive LMS website using WordPress and Elementor, with an emphasis on clean UI/UX. The project included designing structured course layouts and intuitive navigation for both learners and instructors.

ABSSHAKEEL Portfolio (Client Project)

I designed a modern, responsive portfolio website for a creative professional using Elementor. I customized layout sections to showcase projects effectively while ensuring clarity and performance.

TechDSF Agency Website

I am developing a professional agency website for TechDSF using WordPress and Elementor. The project focuses on creating a modern, responsive design with well-structured layouts, engaging visuals, and cross-device compatibility. My role includes designing dynamic web pages, ensuring consistency in UI/UX, and optimizing the site for performance and user engagement.

GiftNest E-commerce Website

I am developing the frontend of a modern e-commerce website for GiftNest using HTML, CSS, and JavaScript. This v1 focuses on a clean, responsive design with smooth user interactions, built on PHP + Laravel as the project framework.

My role includes designing user-friendly interfaces, maintaining UI/UX consistency, and optimizing the browsing experience across devices.

ACHIEVEMENTS & AWARDS

- Successfully developed and presented the Banking Transaction Management System as a university project.
- Completed the WeatherPro Android application using Java as part of academic coursework.
- Designed and delivered a Web Design project for TechDSF during WordPress trainee program.
- Completed a Machine Learning Algorithms course from Simplilearn, gaining foundational knowledge in key ML concepts and techniques.
- Completed a Front-End Development course from CodeSignal, gaining hands-on experience in HTML, CSS, and JavaScript, and building responsive, interactive web interfaces.

VOLUNTEER EXPERIENCE

Volunteer, Daffodil Family Day

- Daffodil International University | 2025
- Actively participated in organizing and supporting the Daffodil Family Day event.
- Assisted in event coordination, guest management, and on-site activities.

Volunteer Interviewer, GoEdu Platform

- Daffodil International University | 2025
- Conducted interviews for GoEdu platform candidates to support student engagement and selection.
- Developed communication and professional interviewing skills through live sessions.
